Capstone Project: Final Presentation

NomNom Safe

Anna Dinius

Problem Domain

Facilitating food service providers in their tracking, management, and communication of accurate and reliable allergen and dietary information so their customers can quickly and easily identify safe businesses and menu items while reducing health risks

Solution Domain

A **2-sided web-app** that streamlines the management and sharing of allergen and other dietary information

- **Business side** - provides workflows for staff to upload and manage allergen and dietary information for their business and their menu items to the level of detail that fits their needs
- **User side** - provides workflows for the business's customers to search and filter the business data to locate businesses and menu items that are safe for them to eat based on their allergen(s) and/or other dietary restriction(s)

Technology Stack

> For more details, see `tech-stack.pdf` on GitHub

Full-stack web app tech stack:

- Database: Cloud Firestore
- Authentication: Firebase Authentication
- Business side:
  - Frontend: React, SCSS, Bootstrap
  - Backend: Node.js, express
- User side: Flutter, Dart

Challenges and Changes

Sprint 1

- Severely underestimated the size of my features

Sprint 2

- Significant personal life events led to change in direction
- Original direction:
  - Conduct user testing with Business Side & make app revisions
- Updated direction:
  - Prepare User Side for demonstration

Sprint 1 Timeline

Focus: Business Side

- **Week 4:** switched backend to be compatible with the Firebase database
- **Week 5:** refactored the backend using SW Design Patterns and principles
- **Week 6:** refactored the frontend auth & account flows using SW Design Patterns & principles & improved navigation
- **Week 7:** implemented responsive design throughout the app & cleaned up stylesheets

Sprint 2 Timeline

Focus: User Side

- **Week 10:** used AI to collect information on the most effective testing strategies for web applications
- **Week 11:** consolidated testing strategy info form week 10 & used AI to analyze the best method combinations
- **Week 12:** break due to personal life events
- **Week 13:** fixed up app for Celebration demo
- **Week 14:** continued fixing up app for Celebration demo
- **Week 15:** prepared & gave presentation at Celebration

Week 13: Closer Look

> For more details, see `demo-preparation.md` on GitHub

User Side Progress:

- Fixed edge cases
- Fixed errors and bugs
- Fixed MCP access
- Audited Firestore collections
- Updated models to match schema changes

Week 14: Closer Look

> For more details, see `demo-preparation.md` on GitHub

User Side Progress:

- Improved UI consistency
- Standardized user feedback
- Cleaned up code

Burndown Rate

How I Used AI

- **Tools:** Copilot, Claude, ChatGPT, Gemini
- I used them as:
  - **Assistants** - I used them to assist in conducting research related to the app.
  - **Programmers** - I guided them in providing structured code for what I needed and double-checked their results before integrating them.
  - **Advisors** - I had them analyze the codebase and provide feedback on ways to improve the readability, maintainability, and extendability of the code.

Project Statistics

Section	LOC	File Count
User Side	8,859	62
Business Side	15,850	191
Total Project	**24,709**	**253**

Demonstrations

- User Side
  - User side (recorded by me)
- Business Side
  - Business side (recorded by Jeff)

Publication

- Public presentation at the **Celebration of Student Research and Creativity**
  - Thursday, May 23
    - 11 am - 12 pm
    - 12-minute presentation
  - PowerPoint slide deck
    - Demonstration videos
  - Celebration program booklet with project abstract on page 8
- Public portfolio available on my GitHub.io page

Flag for follow up. Completed on 4/26/2026.

Hi Anna,

As part of this year's Celebration of Student Research and Creativity, NKU's Office of Student Wellness Education would like to acknowledge your project, *NomNom Safe: A Structured Approach to AllergenAware Food Service Provider Menu Communication*, for its contribution to wellness research.

The goal of Student Wellness Education is to provide a holistic, student-centered approach to educational resources and programming that promotes the well-being of the NKU community. Your work aligns with this mission, reflecting a commitment to advancing knowledge around one or more of the ten dimensions of wellness: creative, digital, emotional, environmental, financial, intellectual, occupational, physical, social, and spiritual.

I regret that I was unable to attend your presentation, but in recognition of this achievement, I would like to present you with a special ribbon as a symbol of your contributions toward fostering a culture of innovation and wellness within our academic community. The ribbon can be picked up in SU 301 before the end of the semester.

We are proud to recognize your achievements in this area and look forward to seeing the positive impact your research will continue to have.

With Norse Pride,

Dr. Kilmer

Anna,

Congratulations! A panel of judges reviewed presentations from Celebration of Student Research and Creativity 2026 and have determined that you are one of the winners from our oral presentation competition for your presentation "NomNom Safe: A Structured Approach to Allergen-Aware Food Service Provider Menu Communication".

You can stop by our office at GH 358 to pick up your prize.

Congratulations - well done!

Dr. Reilly

Shauna Reilly, PhD
Assistant Vice Provost for Outreach and Engagement
Regents Professor of Political Science
Northern Kentucky University
